

WASTE CONTAINER WITH ANTI-MICROBIAL AGENT

ABSTRACT

This invention relates to a waste container for receiving thrown up stomach contents. A waste container includes an elongated moisture proof bag having an open end, an inner surface and an outer surface. The area bounded by the bag open end and the bag inner surface defines an inner portion of the bag. A rigid ring integrally connects to the bag open end. At least one anti-microbial agent is located in the inner portion of the bag.
